

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) A computer readable medium method to perform customized error handling, comprising:

analyzing an application program prior to execution;

in response to the analyzing of the application program, detecting a sub-sequence of the application program that, when executed, will cause an error a first error message to be displayed; and

intercepting the first error message;

retrieving a second error message corresponding to said error;

prior to execution of the application program, overwriting the sub-sequence of the application program with new instructions that, when executed, will cause a second error message to be displayed.

replacing said first error message with a second error message.

7. (Cancelled)

8. (Cancelled)

9. (Cancelled)
10. (Currently Amended) A method to perform customized error handling, comprising:
~~monitoring a system for an error;~~
~~intercepting a first error message corresponding to said error;~~
intercepting a message that has been sent to a display;
searching the message;
detecting a first error message in the message;
retrieving a second error message corresponding to said first error message; and
sending said second error message to the display ~~a display~~.
11. (Original) The method of claim 10, wherein said retrieving comprises retrieving said second error message using said first error message.
- C 12. (Currently Amended) An article comprising:
a storage medium;
said storage medium including stored instructions that, when executed by a processor,
result in ~~detecting an error having a first error message, intercepting the first error message,~~
intercepting a message that has been sent to a display, searching the message, detecting a first
error message in the message, retrieving a second error message corresponding to the first error
message said error, and sending the second error message to the display. ~~replacing said first~~
~~error message with a second error message.~~
13. (Cancelled)
14. (Currently Amended) The article of claim 12 ~~13~~, wherein the stored instructions, when executed by a processor, further result in terminating said first error message.
15. (Original) The article of claim 12, wherein the stored instructions, when executed by a processor, further result in retrieving a second error message by searching an error translation

c1 table using said first error message, and retrieving said second error message from said error translation table corresponding to said first error message.
